

# WM IS SHIFTING TO SINGLE STREAM RECYCLING

To improve safety and efficiency and allow for increased collection of recyclable materials, WM is transitioning to single-stream or all-in-one-cart recycling. We will deliver a wheeled 96-gallon cart to you by January 26, 2024, at no cost. With this new cart, you will no longer have to separate your recyclable materials.

Dear Customer:

WM of Colorado is transitioning to single-stream recycling collection in Palisade. We will deliver a wheeled, 96-gallon recycling cart by January 26, 2024, at no cost. You can put all of your recyclable materials in the one cart, rather than separating. We will use a truck with a hydraulic arm to lift and empty carts, which improves safety and efficiency. Pickups will occur in the current location (either in alley or at curb).

**Please begin using your new cart the week of January 29.** The larger cart will allow you to recycle more clean paper, cardboard, metal food and beverage cans, glass bottles and jars, and plastic bottles and jugs. Empty your recyclables loosely (not bagged) into your cart. All recyclables may be co-mingled in the cart - no separation is needed. For more information on what is and is not recyclable, please visit [wm.com/recycleright](http://wm.com/recycleright).

### **Recycle Your 18-Gallon Bins**

After you receive your 96-gallon cart, please leave your **empty** WM recycling bins out on your regular collection day, so that WM can pick them up for reuse.

Thank you for helping WM transition to single-stream recycling in Palisade. We hope you enjoy the increased convenience.
